AEGIS ENTERPRISE — SIX CONNECTED LAYERS

	Module	Key controls
1 AI System of Record — Inventory & classify AI systems, models, agents, tools, vendors, data	**AEGIS Register**	EI-01 · EI-02 · EI-07
2 Assessment & Risk Engine — Maturity, use-case, agentic, privacy, security & vendor assessments; risk tiering	**AEGIS Assess**	GL-01 · GL-02 · EI-02
3 Policy & Control Library — 64 versioned controls with indicative NIST AI RMF / ISO/IEC 42001 / EU AI Act mappings	**AEGIS Control**	AO-01 · GL-03 · GL-10
4 Lifecycle Governance — Intake → approval gates → change control → monitoring → retirement	**AEGIS Control**	GL-03 · GL-04 · GL-09
5 Runtime Shield — ALLOW · DENY · REDACT · TRANSFORM · REQUIRE_HUMAN_APPROVAL · ESCALATE · RATE_LIMIT	**AEGIS Shield**	IS-11 · IS-12 · IS-15
6 Assurance & Evidence — Control testing, evidence packs, KPIs, board reporting, incidents	**AEGIS Assurance**	SE-01 · SE-05 · SE-08

continuous improvement

FIVE AEGIS PILLARS (framework)

AO · Accountability & Operating Model | **EI · Enterprise AI Inventory** | **GL · Governance & Lifecycle Control** | **IS · Integrity, Safety & Security** | **SE · Stewardship, Evidence & Assurance**

Cross-cutting guardrails: hash-chained audit log · human approval for high-impact actions · redaction before LLM calls · evidence labels · citation-first answers · least-privilege tools

Integrations: LLM apps & agents (SDK / gateway) · CRM & email · IAM / SSO · SIEM / WORM evidence storage · GRC & ticketing

Evidence labels: Verified · User-asserted · Inferred · Missing evidence · Critical gap. AEGIS supports governance readiness, control implementation and evidence collection; it does not certify ISO/IEC 42001 conformity or guarantee EU AI Act compliance.
